

AlphaFlash® ISM

Delivering ISM generated reports in machine-readable format

AlphaFlash ISM delivers key reports generated by The Institute for Supply Management® directly to algo applications. The information is made available immediately upon embargo expiration in machine-readable format via multicast and TCP and can be used to set algorithms to execute financial trading strategies.

Key benefits

- Provides access to key figures published by the Institute for Supply Management
- Designed for easy direct integration into trading algorithms
- Available in data centers across the globe

The Institute for Supply Management

The Institute for Supply Management (ISM) is home to the Manufacturing and Non-Manufacturing ISM Report On Business®. These reports are considered by many to be vital, leading economic indicators, and are followed by economists, organizations, and media outlets around the world.

ISM Manufacturing Report On Business

Issued on the first business day of each month, the ISM Manufacturing Report On Business is considered by many economists to be the most reliable near-term US economic barometer available. It is reviewed regularly by top government agencies and economic and business leaders for its timely, accurate information regarding the manufacturing sector of the economy.

ISM Non-Manufacturing Report On Business

The ISM Non-Manufacturing Report On Business provides overall insight to the services area of the US economy that represents over 80 percent of Gross Domestic Product (GDP). It has been in existence since June 1998 and is released the third business day of the month.

Global connectivity options

Direct connectivity to AlphaFlash is available in data centers in Chicago, Secaucus (New Jersey), Washington DC, London and Frankfurt. AlphaFlash can also be accessed on CFN's Alpha Platform™ as well as TMX Atrium's network.

30-day free trial

AlphaFlash is available for a 30-day free trial.
