

AlphaFlash® Risk Signal

Early warning for macroeconomic releases

AlphaFlash Risk Signal informs users of upcoming economic releases and alerts traders, risk managers and other market participants the moment an economic indicator has been released. Trading and risk management systems can be adjusted in time to account for the specific event.

Key benefits

- Provides early warning on more than 150 global economic releases
- Alerts are first sent out 24 hours before the release of a scheduled economic event
- The feed also includes a message the moment the data is sent and the actual reported economic data
- Designed for easy direct integration into trading and risk management systems

Data covered

AlphaFlash Risk Signal covers important economic indicators and releases such as central bank interest rate decisions, employment numbers, housing statistics, gross domestic product figures, CPI, industrial output, USDA releases, money supply and more.

Timing of alerts

AlphaFlash Risk Signal sends alert messages unique to each upcoming economic release at the following intervals:

- Upcoming event notifications: 24 hours, 1 hour, 1 minute, 30 seconds and 10 seconds before the release
- Event release notification: An alert message indicating the actual data has been released is sent within milliseconds

- Event data: 1 second following the economic release, AlphaFlash Risk Signal sends out the actual reported economic data

Message format and distribution

Messages are sent in a binary format via IP multicast or TCP.

Global sources

U.S. Departments of Labor, Treasury and Commerce, The Conference Board, National Association of Realtors, Bank of Canada, European Central Bank, Bank of England, Z.E.W., Institute for Economic Research Ifo, German Ministry of Economics, Eurostat and more.

Global connectivity options

Direct connectivity is available in data centers in Chicago, Secaucus (New Jersey), Washington DC, London and Frankfurt. AlphaFlash can also be accessed on CFN's Alpha Platform™ as well as TMX Atrium's network.

30-day free trial

AlphaFlash Risk Signal is available for a 30-day free trial.
