

AlphaFlash® US Treasury Feed

Machine-Readable US treasury auction data

AlphaFlash provides machine readable announcements and results from the US treasury auctions.

Algo traders, analysts, asset managers, hedge funds and risk managers operating in an automated, low latency trading environment can use the information to set algorithms to execute financial trading strategies. The information is made available in machine-readable format via multicast and TCP.

Key benefits

- Consistently faster and more economical than competitor products
- Designed for easy direct integration into trading algorithms
- Available in data centers across the globe

US Treasury Feed

The AlphaFlash US Treasury Feed contains information sourced from the New York Fed covering:

- Treasury Bills
- TIPS & Cash Management Bills
- Treasury Notes
- Treasury Bond
