

AlphaFlash

The fastest machine-readable economic news

AlphaFlash delivers global market moving macroeconomic indicators, treasury auction data and Fitch ratings directly to algorithmic applications in machine-readable format. It was developed in-house and enables our journalists who have direct access to government lock-up rooms and embargoed releases to deliver market moving news. AlphaFlash is available in data centers across the globe, CFN's Alpha Platform as well as TMX Atrium's network.

Features Include:

- Delivers machine-readable global macroeconomic indicators, treasury auction results, Fitch rating and unscheduled corporate news
- Coverage includes US, Canada, Australia, Japanese and Chinese markets
- Easy integration into trading algorithms
- Fastest and most economical algo news feed available
- Send data directly from government lock-ups and embargoed releases at release time
- Low Latency
- Offers various proximity hosting, co-location, leased lines and internet connections
